MEDICAL LINE

Synergic operation two active ingredients – silver and white clay; products is intended for application in prophylaxis, prevention and alleviation of skin diseases, as well as in assisting treatment of existing skin lesions.

Silver is known primarily for its strong anti-bacterial, fungicidal and disinfecting properties. It is safely non-toxic, acts as an antibiotic, killing over 650 pathogens. Destroys fungi and mould, kills parasites. Assists development of cells, does not accumulate in organism. What is important, it does not irritate mucous membranes and does not contain free radicals. Possesses anti-inflammatory properties, does not react with medications. Enhances natural resistance of the body.

White clay – natural clay silicate mineral. White clay is recommended for sensitive, dry and mature skin. It is sufficiently gentle and safe to be used in baby powders. Applied externally, it gently cleanses, removes dead cells and slightly tightens the pores, without drying the skin; possesses alleviating, soothing and mineralising properties and improves skin colour. It owes its properties to the high content of clay silicate (tightens, seals), numerous microelements, such as silicon, calcium, magnesium, iron, potassium, sodium and mineral salts (nourishes and regenerates). The clay is applied as an anti-bacterial preparation, detoxifying, re-mineralising, cicatrising, as well as stimulating body functions. Thanks to its properties, it absorbs excess sebum and toxins detrimental for the skin.

500 ml

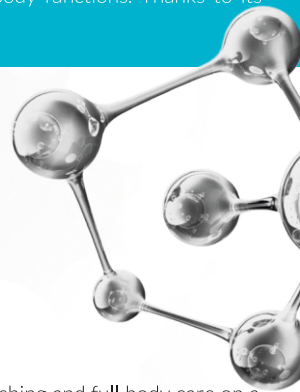

Natural Soap with Silver and White Clay

Pharmedis with silver and white clay is intended for washing and full body care on a daily basis. Thanks to the exceptional formula, the soap decreases inflammations, nourishes and regenerates skin, possesses soothing, smoothing and mineralising properties, increasing natural protective barrier of the skin. Gently cleanses, removes dead cells of epidermis and slightly tightens the pores, without drying the skin. In case of irritated skin, skin with a tendency for atopic dermatitis and atopic skin, the soap alleviates irritation, reduces sweating and regulates sebum excretion in case of seborrhic skin.

Recommended as an adjuvant in the treatment of:

- ✓ acne, including acne rosacea;
- ✓ seborrhic skin diseases;
- ✓ atopic dermatitis;
- ✓ skin allergies;
- ✓ existing skin lesions.

Protection in care for mixed and oily skin. For washing sensitive skin, allergic skin and skin prone to irritations as prophylaxis. As prophylaxis and protection for washing skin around stoma, washing skin of patients with a tendency for bedsores, rash and other skin lesions. As protection for washing skin of patients suffering from incontinence and suffering from excessive sweating.

100 g

150 ml

50 ml

Foot Cream with Silver and Urea

Is intended as prophylaxis for dry skin, alleviation of symptoms, as well as a supplement in the treatment of the following skin diseases:

- ✓ foot psoriasis;
- ✓ palmoplantar keratoderma;
- ✓ foot calluses;
- ✓ foot eczema;
- ✓ foot mycosis (as a supplement);
- ✓ foot hyperhidrosis.

Urea contained in the cream is responsible for a strong moisturizing effect. It prevents water loss and makes the skin soft and pleasant to the touch. It also exfoliates, helping to remove dead epidermis. Silver assessed in the cream has bactericidal and fungicidal properties, and also protects against fungal infections and eliminates unpleasant odors.

Regenerating Hand Cream with Peat and Shea Butter

The cream is intended for everyday use in hand care, for all skin types, including those particularly exposed to harmful and irritating factors.

Thanks to the content of specially selected active ingredients:

Peat is a biologically active type of turf with medicinal properties. Humus acids contained in peat possess sorptive properties, whereas mineral salts provide the skin with favourable, slightly acidic pH balance. Peat possesses anti-inflammatory, astringent and bacteriostatic properties; it warms up the skin and relaxes it, improving blood circulation and appearance.

Shea butter is plant oil produced from the seeds of African Shea tree. It contains oil substances, vitamin A, E and F and filters protecting from UVB radiation. Protects and reinforces inter-cellular cement, stimulates cellular metabolism, reinforces local capillary circulation. Possesses skin softening properties. Alleviates irritations.

50 ml

Intensely Regenerating, Hydrating and Firming Body Balm

Strongly regenerating body balm, thanks to high content of selected active ingredients stimulates cellular metabolism, supports skin regeneration process, nourishes, firms and hydrates the skin, helps maintain natural lipid coat of skin and increases natural skin protection barrier. Use of top quality natural plant oils allows for transport of nutrients to deep layers of the skin. Natural product, recommended even for very sensitive skin.

High content of Shea butter intensely conditioning, oiling and hydrating properties, rich in natural allantoin, pro-vitamin A, vitamins F and E and saturated and unsaturated fatty acids. Substances contained in the butter accelerate healing of wounds, irritations, inflammations and sun burns. Avocado oil easily absorbed by the skin, a rich source of vitamins A, B, D, E, H, K and PP, intensely hydrates and nourishes the epidermis and supplements the natural lipid barrier of the skin, improves skin tension and appearance. Additionally it also stimulates collagen synthesis, protects from the impact of harmful external factors and free radicals and possesses soothing and anti-inflammatory properties.

Grape seed oil absorbs very well, hydrates, nourishes and alleviates irritations, possesses anti-inflammatory and anti-histamine properties, stabilises collagen and elastin, facilitates regeneration of damaged skin. Linseed extract is source of unsaturated fatty acids and vitamin E, anti-inflammatory and anti-itch properties. Stimulates also regeneration processes of the skin and epidermis, accelerates healing of burns, bedsores, ulcerations and abscesses.

200 ml

300 ml

Intimate Hygiene Gel with Calendula

Natural intimate hygiene gel is intended for every-day washing and care for intimate parts. Thanks to the content of calendula extract, it possesses anti-inflammatory properties, protects from irritations and stimulates skin regeneration processes. High content of lactic acid helps maintain physiological pH balance of the skin, protects sensitive intimate area from infections, restores microbiological balance.

Intimate Hygiene Gel with Oak Bark

Natural intimate hygiene gel is intended for every-day washing and care for intimate parts. Thanks to the content of oak bark extract, it possesses soothing properties, alleviates micro-injuries, irritations and skin redness. High content of lactic acid helps maintain physiological pH balance of the skin, protects sensitive intimate area from infections, restores microbiological balance.

300 ml

Creamy emulsion for intimate hygiene Sensitive

It is intended for daily hygiene of intimate areas. Contains mild washing substances. Formula enriched with prebiotics that support the skin microbiome and natural lactic acid that restores the appropriate pH of intimate zones. The preparation also uses flax seed extract, betaine and squalane with moisturizing and soothing properties.

300 ml

MEDICAL LINE, ANTIBACTERIAL SERIES

The Medical Antibacterial Series is made of ingredients that protect the skin against viruses and bacteria. The strong concentration of the active substance provides full and comprehensive protection. Additionally, glycerine and lanolin contained in the products have a caring function and moisturize. The innovative use of ozone guarantees even sensitive and delicate skin full comfort of use and perfect antibacterial protection while preserving ingredients of natural origin.

150 ml

Caring hand cream gel with active ozone

Caring hand cream-gel with active ozone is a cream-gel preparation with moisturizing and antibacterial properties. It does not dry the skin thanks to the content of natural betaine and low alcohol content - only 2%. It inhibits the growth of microorganisms while moisturizing the skin.

The product cares for your hands by properly moisturizing them, and anti-bacterial protection is provided by ozone particles. It is especially recommended for sensitive and delicate hand skin. The product has been dermatologically tested.

200 ml

Refreshing, antibacterial hand gel

Refreshing, antibacterial hand gel is a preparation for quick use when there is no access to water: while traveling, on a walk, shopping, at school, in public places. The ethyl alcohol content of 70% guarantees the reduction of the amount of microorganisms and inhibits their growth. It is characterized by a nice and fresh scent of green tea. It contains glycerin, which moisturizes and soothes, protecting the skin from drying out. The product has been dermatologically tested.

100 ml

Refreshing, antibacterial hand lotion

Thanks to the atomizer, the antibacterial liquid is used not only to protect the skin of the hands, but also can be used on larger surfaces at home and outside. Effectively fights bacteria and viruses. The ethyl alcohol content of 70% guarantees the reduction of the amount of microorganisms and inhibits their growth. The preparation is characterized by a nice and fresh scent of green tea. It contains glycerine and lanolin, which moisturize and soothe the skin, protecting it against viruses. The product has been dermatologically tested.

ECO GOLD LINE

The properties of argan oil are used in the care of all skin types, especially for sensitive, dry, allergic, as well as acne and mature skin. The products of the ECO GOLD LINE are based on argan oil with the ECOCERT certificate, known as the gold of Morocco or the elixir of youth. The oil comes from ecologically clean crops, it is a rich source of vitamin E and antioxidants. It has a soothing, moisturizing and regenerating effect. It makes the skin beautiful and a young look. It has strong firming, smoothing and revitalizing properties. ECO GOLD LINE products are ecological, free from parabens, SLES, phthalates, silicones, mineral oils and petroleum derivatives and substances from genetically modified crops.

Face cream with Argan oil

Made of best quality selected vegetal ingredients. Exceptional combination of active ingredients brings healthy, fresh and radiant appearance to skin. The cream possesses intense moisturising, firming and nourishing properties. High content of vitamin E and plant sterols protect the skin from the impact of harmful external factors. Argan oil (ECOCERT) is a rich source of vitamin E and anti-oxidants. Possesses soothing, hydrating and regenerating properties, makes the skin look beautiful and young. Recommended for all skin types.

50 ml

Body Butter with Argan oil

Exclusive body butter with Argan oil (ECOCERT), it is Shea butter and top-quality selected plant oils. This exceptional combination of active ingredients rich in vitamins E, D and A, as well as unsaturated fatty acids guarantees proper level of hydration for the skin, restores its firmness and lustre. Thanks to the high anti-oxidant content, it protects the skin structure from unfavourable impact of external factors. Contains illuminating particles: silica flour.

200 ml

Body Scrub with Argan oil

Eco Argan Body Scrub. Exclusive sugar and salt body scrub with Argan oil (ECOCERT), gently massages the skin, exfoliates dead epidermis, cleanses from toxins, nourishes and firms the skin. An exceptional combination of active ingredients contained in natural plant oils rich in vitamins and minerals hydrates and revitalises the skin, restoring its healthy and radiant appearance. Argan oil, rich in vitamin E, regenerates the skin, alleviates irritations and protects from harmful impact of external factors. The body scrub is an ideal basis for further care treatments.

200 ml

Body Elixir with Argan oil

Exclusive "elixir" body lotion: prepared on the basis of Shea butter and a unique composition of natural oils, i.e. argan oil (*Argania spinosa*) and avocado oil. Ensures intense and long-lasting moisturisation of the deep layers of the skin. Relieves an unpleasant sensation of a tensed-up skin, alleviates irritations and generally strengthens the skin, while restoring its natural firmness and suppleness. Makes it velvety soft, leaving a delicate film on its surface. Effectively retards natural skin aging process.

50 ml

Eco Argan Oil

Eco Argan Oil (ECOCERT), recommended for all skin types, in particular sensitive, dry and allergic skin, as well as skin with acne and mature skin. Argan oil possesses strong moisturising, firming, smoothing and revitalising properties. Thanks to the presence of phytosterols, it prevents inflammations and soothes the skin, accelerates healing of wounds, scars, as well as burns, e.g. sun burns. It is a rich source of tocopherols and vitamin E, which protect the skin structure from damages caused by external factors.

Argan oil is a 100% natural product, not processed chemically. It is free from preservatives and artificial dyes, which makes it ideal even for very sensitive skin.

50 ml

30 ml

Under-eye cream with Argan oil

Exclusive under-eye cream with Argan oil (ECOCERT), avocado oil, goat milk proteins, chestnut tree extract and vitamin C. Argan oil is currently the most valuable cosmetic oil, appreciated mainly on account of its hydrating, regenerating and soothing properties, as well as richness of vitamin E. Chestnut tree extract strengthens and seals capillaries, possesses anti-swell and anti-inflammatory properties, helps reduce bruising under eyes. Vitamin C is one of best examined cosmetic ingredients, valued predominantly as a strong and efficient antioxidant, fighting free radicals and supporting anti-sun protection and an ingredient stimulating collagen synthesis; it possesses anti-inflammatory properties and brightens blemishes. Additionally, Eco Argan Eye Cream was enhanced with new generation peptide anti-wrinkle complex that fills mimic wrinkles from the inside and firms the skin.

Natural soap with Argan oil

Exclusive regenerating and soothing soap with Argan oil (ECOCERT).

100% vegetal, with avocado oil, jojoba oil, sweet almond oil, Shea butter and olive oil.

Argan oil is currently the most valued cosmetic oil, rich in nourishing properties.

It is recommended for practically all skin types, in particular for sensitive skin, dry and allergic skin, as well as skin with acne and mature skin. Alleviates symptoms of acne, allergy and psoriasis. Possesses hydrating, firming, smoothing and revitalising properties.

Thanks to the presence of phytosterols, including mainly spina sterol, it possesses anti-inflammatory and soothing properties, accelerates healing of wounds, scars, cellulite and sun burns.

130 g

ECO LINE

The series of natural soaps was created thanks to harmoniously combined, gently, plant ingredients of the highest quality washes, cleans and cares. The main ingredients of the products are: avocado oil, olive oil, Shea oil, macadamia oil, jojoba oil, sweet almond oil, grape seed oil, oil from coconut palms. Recommended for the care of all types of mature skin.

130 g

Natural Soap with Almonds and Musk

Excellent natural conditioning soap based on top quality plant oils, including olive oil, sweet almond oil and Shea butter. Gently washes, cleanses and nourishes the skin, whereas the particles of ground almonds immersed in the soap scrub it, leaving it silky smooth, soft and velvety to touch. Sensual, warm musk scent gently wraps the skin, leaving an impression of a powdery finish.

130 g

Natural Soap with White Tea

Soap made in 100% from vegetal ingredients with 8 natural plant oils: avocado oil, Shea oil, macadamia oil, jojoba oil, sweet almond oil, grape oil, coconut palm oil.

Concentrated operation of vitamins C, A, D, E, B and omega acids contained in the oils makes the skin intensely hydrated, optimally nourished and gently oiled after washing. Gentle fragrance of luxury white tea relaxes and calms.

130 g

Natural Soap with Pear and Cinnamon

Exclusive soap based on olive oil and Shea butter, enriched with cinnamon oil and ground cinnamon. Top quality natural vegetal ingredients gently wash and nourish the skin, leaving it smooth, soft and velvety to touch. Cinnamon oil contained in the soap warms you up and possesses astringent and antiseptic properties. Combination of excellently composed pear and cinnamon fragrances is relaxing and calming.

Natural Soap with Peat

Soap based on palm oil, olive oil and sweet almond oil. Peat is rich in amino acids and mineral salts, including magnesium, manganese, zinc and phosphorus. Improves the condition of dry and flaky skin, decreases skin roughness. Supports natural skin hydrating properties. Olive oil makes the skin retain water. It provides the skin with softness and silkiness, whereas ingredients contained in it possess anti-inflammatory properties. Palm oil and sweet almond oil possess hydrating properties and make the skin smooth and firm.

Natural Lavender Soap

Harmonious combination of top quality plant oils, including sweet almond oil, gently washes, cleanses and nourishes all skin types. Beautiful lavender colour and scent, along with dried lavender bits immersed in the soap bring back the memories from warm and sunny Provence.

SCANDINAVIAN LINE

Consists of products for make-up removal and facial skin care for all skin types, including sensitive, allergic, with capillary problems and problematic skin. The recipes are based on the highest quality certified vegetable oil, liquid crystal emulsifier and the latest generation specially selected plant complexes. All products have been deprived of perfume and artificial colours, are free of parabens, silicones, phthalates, mineral oils, petroleum derivatives and substances from genetically modified crops.

Normalizing Cream per day/ per night for problematic skin

Built on the highest quality vegetable oils, including: argan oil, avocado oil, almond oil, Shea butter. Vegetable oils moisturize, nourish and protect the skin from harmful external factors. Specially selected, certified plant complex rich in polyphenols and active ingredients, among others: the leaves of black currants and raspberries, regulates the secretion of sebum, reduces the growth of bacteria and is anti-inflammatory. Additional product enrichment with vitamins C and E brightens and tones the skin. Through the use of liquid crystal emulsifier the cream is quickly absorbed, doesn't leave greasy film and the active ingredients reach deep layers of the skin.

Soothing day/ night cream for capillary skin

Created on the basis of: avocado oil, argan oil, macadamia oil, almond oil to moisturize and nourish the skin and protect it from harmful external factors. Used in cream unique plant complex consisting of six herbs and vitamins reduces congestion, soothing, soothing and anti-inflammatory. Enrichment of the product with vitamins C and E seals and strengthens blood vessels, brightens and tones the skin. Through the use of a liquid crystal emulsifier of the cream is quickly absorbed, doesn't leave greasy film and the active ingredients reach deep layers of the skin nourishing and protecting it.

200 ml

Fragrance-free facial cleansing milk

Gentle facial cleansing milk, fragrance-free for face, neck and eye area. By using specially selected natural ingredients it does not cause irritation and does not clog the pores. Maintains ideal moisture level of the skin, removes even waterproof makeup, leaving skin clean, fresh and matte. Through the use of a liquid crystal emulsifier of the cream is quickly absorbed, doesn't leave greasy film and the active ingredients reach deep layers of the skin nourishing and enriching it. For all skin types, including problematic skins.

Cleansing tonic

Does not irritate the skin, nor clogs pores. Allantoin contained in the tonic accelerates regeneration of skin, soothes irritations, inflammation, moisturizes and smoothes the skin and protects it from harmful external factors. Additional enrichment of product with D-panthenol reduces water loss through the epidermis and provides effective hydration of the skin, gives it softness and flexibility. Aloe extract regenerates and firms the skin, soothes irritations, provides antibacterial function. For all skin types, including dry, capillary and problematic skin.

200 ml

Single-phase micellar water

Removes even waterproof makeup. Leaves skin clean and fresh. Allantoin contained in the fluid accelerates regeneration of skin, soothes irritations, inflammation, moisturizes and smoothes the skin and protects it from harmful external factors. D-panthenol reduces water loss through epidermis, ensures effective hydration of skin and makes it soft and flexible. Green tea guarantees s potent anti-radical effect, it is a rich source of vitamin C, K and the B vitamins, normalizes the activity of sebaceous glands.

Two-phase micellar water

Removes even waterproof makeup. Allantoin contained in the fluid accelerates regeneration of skin, soothes irritations, inflammation, moisturizes and smoothes the skin and protects it from harmful external factors. D-panthenol reduces water loss through epidermis, ensures effective hydration of skin and makes it soft and flexible. D-panthenol stimulates cell division, so it heals and regenerates the skin.
